- **Coursework:** Software Engineering, Data Structures and Algorithms, Databases, Computer Systems, Software Design, Software Tools and System Programming, Principles of Programming Languages, Computer Organisation

EXPERIENCE

Teaching Assistant

Jan 2022 – Aug 2022

Software Tools and System Programming (CSCB09)

University of Toronto - Scarborough Campus, Ontario

- Conducted tutorials with 40+ students for the course with 100% approval from students.

Tutor

May 2021 – Aug 2021

Software Tools and System Programming (CSCB09)

University of Toronto - Scarborough Campus, Ontario

- Tutored two students in CSCB09 resulting in both students understanding and performing 20% better in later assignments and exams.
- Created solutions for past finals from 2015 – 2020 which were used by 60+ students in the course.
- Furthered understanding of C, bash/zsh and built communication skills through tutoring.

PROJECTS

Startup App – Pawsup (JavaScript)

Sep 2021 – Dec 2021

- Collaborated with a team of developers to create a full-stack *progressive web app* for petowners to connect with pet-sitters and vice-versa using *MongoDB*, *React Native*, *Node.js* and *Express.js*.
- Followed the *Agile Development* methodology with weekly deliverables.
- Used *Jira* for project tracking and *Git* for version control with advanced *gitflow* use.

Discord bot – Kanye Weast (Python)

Aug 2021 – Present

- Collaborated with a fellow student to create an always-on Discord bot through Replit which is used by 200+ of users daily.
- Generated lyric info for songs from a specific artist and webscrape data for Pokémon, using *BeautifulSoup*, *geniuslyrics*, *PokeAPI* Python APIs

Medical Clinic App (Java)

Jul 2021 – Aug 2021

- Used *Android Studio* to create medical app for doctors and patients to keep track of appointments and medical history.
- Deployed a *Firebase* database to store doctor and patient information.
- Followed the *Agile Development* methodology with biweekly deliverables, while using *Subversion* for version control.
